PENUMBRAE

(On the Fringe of Shadows)

for chamber ensemble

(2020)

Written for and dedicated to Hezarfen
Ensemble.

INSTRUMENTATION

Ney
Flute
Bass Clarinet
Percussion
Piano
Kanun
Kemençe
Violin
Viola
Cello

The score is in C
The duration is approximately 13 minutes and 30 seconds.

The piece is in three short movements:

I
Ney, Bass Clarinet, Percussion, Piano, Violin, Viola, Violoncello
5 mins. 30 sec.
II
Flute, Piano, Kemençe,Violin, Viola, Violoncello
3 mins.
III
Flute, Bass Clarinet, Percussion, Piano, Kanun, Violin, Viola, Violoncello
5 mins.

COMMENTS ON NOTATION AND PERFORMANCE TECHNIQUES

General

The piece should be performed absolutely without any vibrato, unless otherwise indicated.
Accidentals effect the whole measure. Cautionary accidentals are used extensively.

crescendo from / diminuendo to silence

quarter-tone flat

quarter-tone sharp

three quarter-tone sharp

slightly sharper, exact intonation in cents is indicated on the score

slightly sharper, exact intonation in cents is indicated on the score

Glissando

Tremolos are always unmeasured.

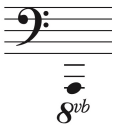
Stop the tremolo

A line with an arrow between two different playing techniques indicate a gradually change from one into another one.

PIANO

Piano Preperation

Prepare the lowest key so it does not produce any pitch but low percussive sound that resembles a bass drum. In order to achieve the string should be completely muffled with a large strong clip.



Prepare the highest key with a patafix so it produces a toneless hammer attack.

Place a metal screw between two strings for each of the following keys.

Keys to be labeled inside of the piano and the harmonic numbers that are used.

Superball

In the first movement. the piano part should mostly be played by dragging a superball on the indicated strings.
The volume is controlled by the pressure applied on the string. It is notated:

Drag the suberball with much pressure

Drag the suberball with no or minimal pressure

E-bow

At the very end of the piece. an e-bow is used to resonate the C string. Gently press the e-bow into the string until it starts resonating than leave it in the string for the indicated duration.

FLUTE AND NEY

Fingerings for multiphonics are indicated on the parts.

Noteheads

Aeolian sound with closed embouchure. White noise with little audible pitch content. Fingerings effect the timbre more than the pitch.

Breathy tone with clear audible pitch

Noise - Tone Balance

5/5 Normal tone
4/5
3/5
2/5

1/5 Breath noise. Pitch as artifact

Harmonic

Harmonic trill

Tongue ram

Slap tongue

BASS CLARINET

Noise - Tone Balance

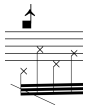
5/5 Normal tone
4/5
3/5
2/5

1/5 Breath noise. Pitch as artifact

Noteheads

White noise with little audible pitch content. Fingerings effect the timbre more than the pitch.

Breathy tone with clear audible pitch



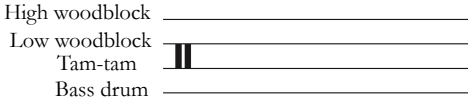
Breath noise with random key clicks

Open slap. (open your mouth very quickly at the same time (or just slightly after) as slapping.

Spectral multiphonics, let the harmonics pop out gently.

PERCUSSION

Tube Caxixi
Vibraphone
Bass drum
Tam-tam
2 Woodblocks



KANUN

Kanun's entire part should be performed with fingers.

STRINGS

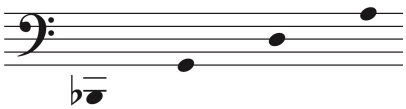
Scordatura

Violin: 3rd string is tune down a half step to C♯
Viola: 3rd string is tune down a half step to F♯
Cello: 4th string is tune down a whole step to B♭
The music for scordatura strings are notated as they would be for a normally tuned strings for ease of legibility.
The sounding results are provided in the bottom staff.

Violin

Viola

Cello



Left hand techniques

There are three different pressure level on the left hand.

normal pressure

between normal and harmonic pressure.

Harmonic pressure

"Non-existing" harmonics. Sometime harmonics that do not produce any harmonic pitch are used.
These should produce a noisy and unfocused tone.
They should always be played sul tasto and flautando.

Other left hand techniques

Place the left hand on indicated string around the approximate pitch area. This should produce an un-pitched airy noise sound.

Bowing

sul tasto	bow right where the fingerboard starts
ord.	normal playing position
sul pont.	one inch in front of the bridge
sul ponte+	half a inch before the bridge. Sound should be metallic and almost no fundamental should be heard

Bowing pressure and speed

flautando	Always performed sul tasto. Very light bowing. Absolutely no pressure on the string. The tone should be unfocused.

Increased bow pressure. The sound is totally saturated. It should sound more like cracking sound.

Bowing with increased pressure. The sound should be slightly distorted but the tone should still be intact.

Normal bow pressure.

Gradually changing the bow pressure

Sudden percussiive attack with strong bow pressure. Should be performed with contolled bow and always sul tasto.

Hard pizzicato

Score
